

Cyber.

Maritime optimised
endpoint security.
Delivered in partnership with CrowdStrike.

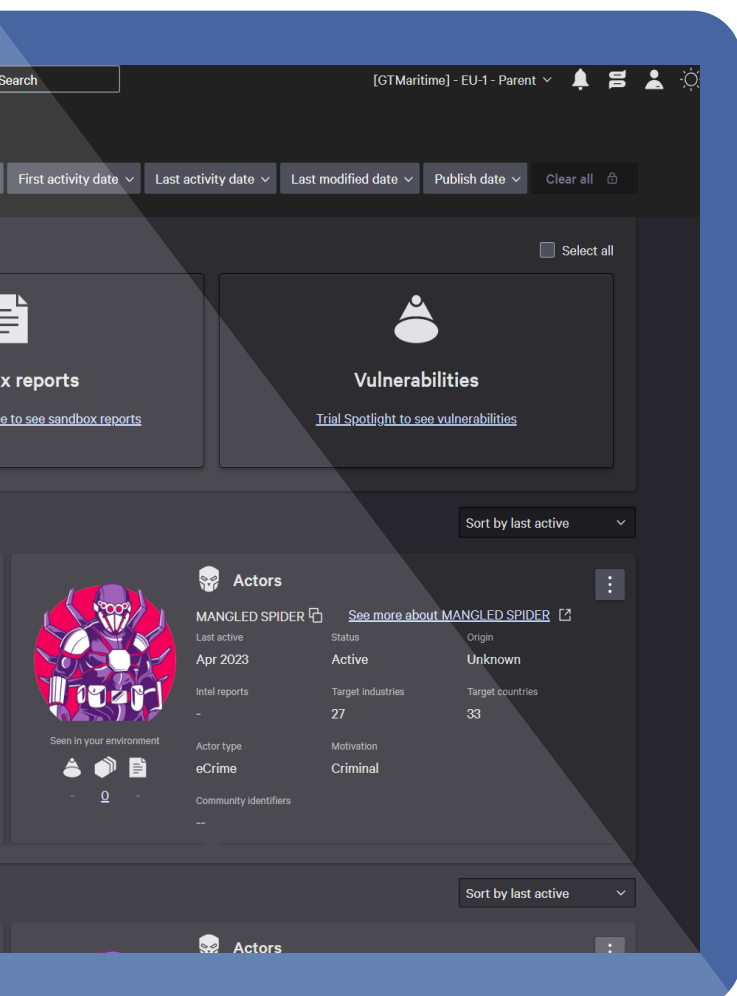

Endpoint Security needs to be the foundation of a modern security strategy, and it needs to be scalable, intelligent and deliver strong protection without impacting productivity.

GTMaritime, in partnership with CrowdStrike, deliver an **end point detection & response (EDR) solution** to meet the ever-changing security challenges of business whilst providing the **support and service** to meet the security challenges **unique to maritime**.

A range of packages are available to suit users budgets and service requirements. The packages, Protect and Advanced Defend, offer different levels of firewall protection, security operations centre, EDR and threat hunting.

Why CrowdStrike?

- ✓ Number one on the Gartner report
- ✓ AI based Next Gen Antivirus (NGAV) with no signatures
- ✓ Software only solution which can be installed remotely
- ✓ Protects against known or unknown malware
- ✓ Fully protects endpoints online or offline
- ✓ Minimal ongoing data overhead
- ✓ Comprehensive shore side management portal
- ✓ Increases security efficiency
- ✓ Simplified deployment and minimal install size (129mb)
- ✓ Trusted by many large ship operators

Why use Cyber?

Additional service to ensure IMO compliance

A range of documents and guidance is provided to support with regulation compliance including a cyber audit report, end point risk review, IMO compliance review and asset management.

Costs to suit all budgets

We offer different packages to suit budget and your vessels bandwidth to ensure your vessels are fully protected.

Next generation anti-virus

AI based next gen antivirus (NGAV) with no signatures.

Centralised control, management and audit

Fleetwide remote management and configuration from a single dashboard. Includes pro-active alerts and automated reports.

Protect your vessels on or offline

The solution provides full endpoint protection on or offline delivering full attack visibility and control.

We provide the ability to isolate assets remotely from shore side including device control such as USB locking.

24 / 7 support every day of the year

Backed by dedicated support from ITIL trained engineers, available 24/7 to make sure you can access your communications when you need them.
