

# GTDeploy

## Maritime optimised fleetwide software updates

A simple and secure way to ensure all your vessels are up to date and security compliant. GTDeploy helps minimise your risk by allowing you to simply deploy software update patches to remote locations.

GTDeploy provides a simple solution that can be managed from shore to ensure that the software on your vessels is up to date.

Cyber security best practice recommends that you should keep all software up to date to ensure your vessels are **fully protected**, and to ensure that you have access to new features and updates. Using GTDeploy allows you to **automatically update** your vessels without the need for crew input.

GTDeploy also allows you to maintain **optimal connectivity**, allowing you to prioritise and install updates depending on your bandwidth availability to ensure you don't impact on crew communications and other business requirements.

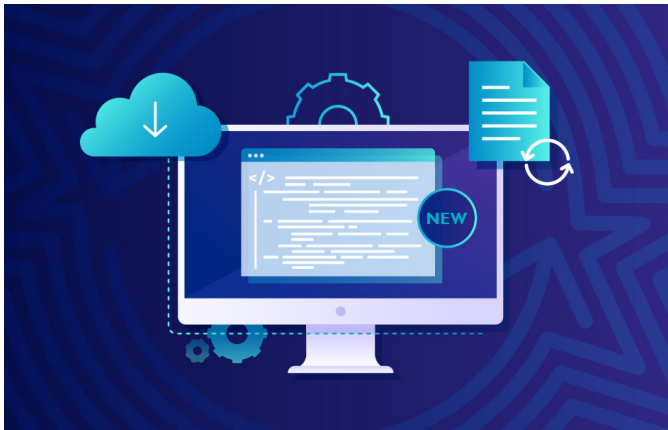

Without **up to date software**,  
your vessels are vulnerable!

The screenshot shows the GTDeploy web interface. On the left is a navigation sidebar with icons for Vessels, Computers, Software, Automation, Deployments, Commands, and Logout. The main content area is titled 'Vessels' and includes a search bar and a 'View By Group' toggle. Below is a table with the following data:

<input type="checkbox"/>	Vessel Name	Account Name	Subscription State	Compliance State	Group	UnderTest	Sentinel
<input type="checkbox"/>	Fastnet Client 08	GBFSTNET08	Live	Live	Root Group		
<input type="checkbox"/>	IRON RENAMED AGAIN3	GBIRONXXXX	Disabled	Live	JS GTM Group		
<input type="checkbox"/>	CH REP SERVER	GBCHREPSRV	Disabled	Live	CH FastNet		
<input type="checkbox"/>	CH REP CLIENT	GBCHREPCLT	Disabled	Live	CH FastNet		
<input type="checkbox"/>	CH Deploy Only 2	GBCHDEPLO2	Live	Live	CH FastNet		

Vessel count: 12423

# Why use GTDeploy?

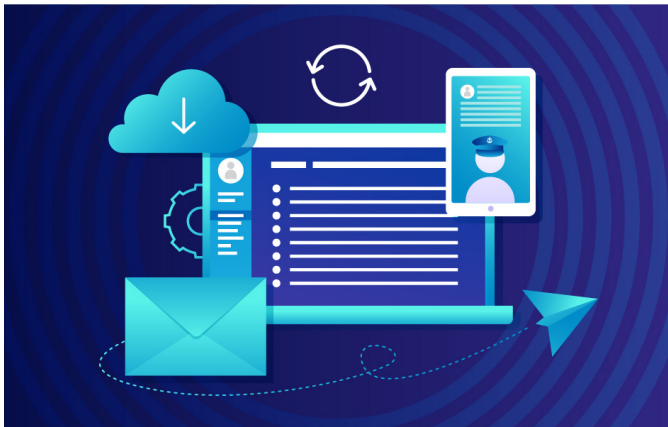

## Keeping you up to date

New features, fixes and bugs are regularly released for software, by automatically updating your software with GTDeploy you can ensure vessels have access to the latest items released.

## Ensure your vessels are security compliant

It is recommended that patch management and software deployment form part of your safety management system. GTDeploy provides a simple automated way to ensure vessel compliance.

## Update software without interfering other business or crew communications

Prioritise updates in line with business requirement and bandwidth availability to reduce the impact on other communication requirements on board.

## Remove the need for crew interaction to install software and updates

IT departments can set up automation for software updates and remove the need for time consuming manual updates and crew interaction.

To find out more about how GTDeploy can help keep your software up to date speak to our sales team today.
