

# GTMailPlus

## Reliable fleetwide connectivity

GTMailPlus secures, optimises and delivers email in the most demanding conditions, working with any satellite provider.

Our advanced network switch capability allows reliable, secure and seamless email delivery across all bandwidth connectivity types, LEO networks or VSAT to ensure your vessels **always remain connected**.

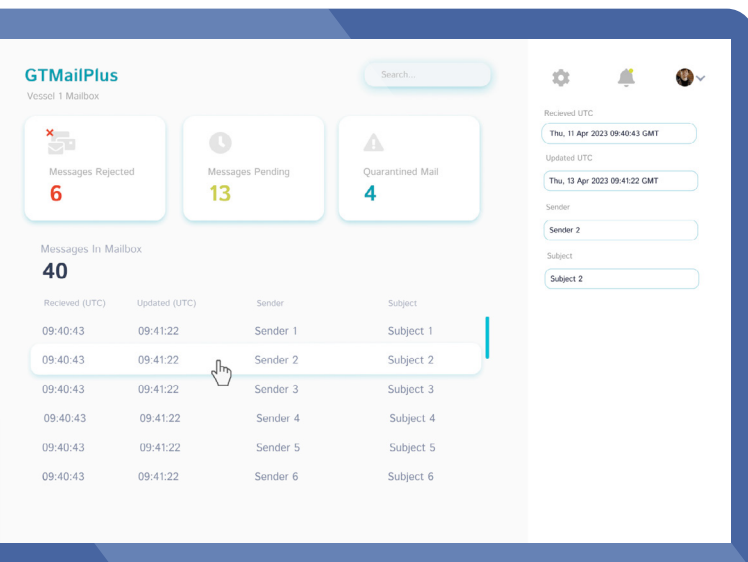

GTMailPlus **integrates seamlessly** with any email client such as Microsoft365, Gmail, Mimecast and more to allow closer connectivity between the vessel and the shore.

With aspects such as restart from the point of interruption and bandwidth management, GTMailPlus provides the **stability, security and optimisation your vessels require**.

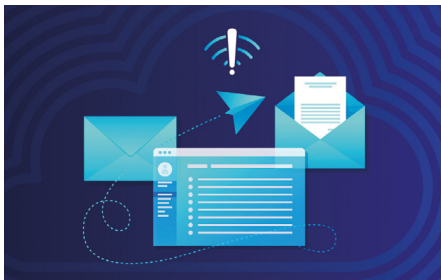

**GTMailPlus**, a reliable maritime dedicated communications platform that keeps you on course.

Secure your vessel, protect your crew and shield confidential information with our integrated security software that keeps you cyber compliant. With enterprise grade security, that is **included as standard**, we ensure vessel compliance, security and business operability 365 days a year.

- ✓ **Advanced Threat Protection**  
GTMailPlus' Advanced Threat Protection (ATP) adds an additional layer of protection providing advanced malware detection, utilising its Global threat intelligence network.
- ✓ **Antiphishing**  
Comprehensive protection against email social engineering attacks.
- ✓ **Archiving**  
Seamless & secure storage and retrieval of 7yrs of emails and attachments.
- ✓ **Continuity**  
Provides an auxiliary email client for the continuity of vessel operations.
- ✓ **Spam Management**  
Providing control of potential spam whilst allowing business emails.
- ✓ **Antivirus**  
Guarding against all known virus signatures through multi-layered detection engines.
- ✓ **eNOAD**  
Submission of electronic notice of arrival and departure forms to USCG NVMC.
- ✓ **Transfer**  
Automated email attachment handling.
- ✓ **Locator**  
Access and display vessel position data from all major GNSS systems, GPS, GLONASS, Galileo and BeiDou.

# Why use GTMailPlus?

## Efficient email transfer

We ensure that you maintain connectivity, even during turbulent weather, or times of high bandwidth consumption, such as coming in and out of port. This saves bandwidth, cost and reduces interruption to crew communications.

## Scalable and redundant infrastructure

Working in partnership with AWS, we host servers in multiple locations to ensure high availability and scalability of service.

## Centralised control, management and audit

Fleetwide remote management and configuration from a single dashboard. Includes pro-active alerts and automated reports.

## Enhanced security features included as standard

Our comprehensive security software is engineered specifically for the maritime environment and provides end-to-end encrypted communications to protect against malware, viruses, spam and phishing. GTMailPlus customers also benefit from a free phishing penetration test for added reassurance.

## We provide a back-up solution for continuity of service

Authorised users have the ability to send and retrieve emails during any interruption in the shipboard email capability, allowing your business to continue uninterrupted.

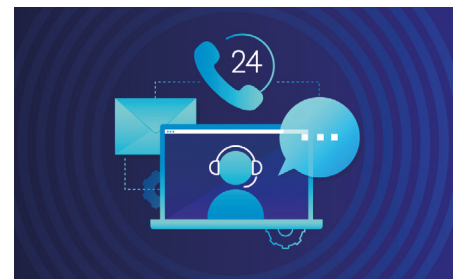

## New WebMail Client

The latest version of GTMailPlus offers a brand-new webmail client which contains a wealth of new features focusing on productivity, including: an advanced WYSIWYG editor; enhanced message and folder management; improved search and sorting; and performance optimisations to improve the onboard user experience.

## Flexible email hosting

We can provide you with an email domain or integrate with your shoreside based solution such as Exchange, Office365, Gmail etc. Our email solution is also airtime independent.

## 24/7 support every day of the year

Backed by dedicated superfast support from ITIL trained engineers, available 24/7, every day of the year, you can trust us to keep you on course.
